

Model 1150

Single-Basin Ultrasonic Cleaning System with TRT Technology

The Model 1150 delivers superior cleaning power in a compact design ideal for most central sterile departments. The Model 1150 includes two lumen trays with dedicated ports for cannulated instruments, and can also be used with your regular hospital trays. To expedite your cleaning needs, a R.A.C.S. tray or additional lumen trays can be ordered.

Independently tested and validated by a FDA-approved lab for cleaning da Vinci® robotic instruments.

Features

- Lumen cycles with industry-exclusive TRT (Titanium Rod Transducer) technology
- 8 da Vinci S®/Si® and/or Single-Site® instruments
- 8- and 13-minute lumen cycles with TRT technology
- Superior cavitation compared to standard ultrasonics
- 24 lumen instruments can be processed simultaneously
- Easy-to-use touch-screen display with programmable timer
- Automatic detergent dispensing capability
- Adjustable irrigation flow control
- Dual purpose - can be used with or without irrigation
- Degas, wash, rinse, and air purge functions
- Compatible with tap or RO/DI water
- UCS-Verify software tracks cycle parameters

• Cleaner • Faster • Better

Model 1150 Specifications

- Dimensions:
30" W × 27-3/8" D × 44-1/8" H
(lid closed)
- Basin Capacity: 12.5 gallons
- Weight Capacity: 25 pounds
- Electrical Supply: 208-volt wall receptacle
