### Section 2: Hazard(s) Identification

<b>GHS classification:</b>	None	<b>Signal word(s):</b>	None
<b>GHS label code(s):</b>	None	<b>Hazard statement(s):</b>	None
<b>GHS pictogram:</b>	None	<b>Precautionary statement:</b>	None

This product presents no health or physical hazards under normal conditions of use. Inhalation of decomposition products may cause eye and respiratory irritation. If irritation develops following inhalation of decomposition products, remove the victim from area to fresh air. If symptoms persist, get prompt medical attention.

This product is essentially nonirritating to skin. Prolonged exposure to skin is not likely to result in material being absorbed through skin in harmful amounts. The aluminum strip or the holder may be hot to the touch if handled immediately after the wash cycle. Ingestion of significant amounts of this product is highly unlikely. Ingestion of physical article may cause choking if swallowed. Single dose toxicity is believed to be very low.

Due to the low levels of hazardous components contained in this product, no acute, delayed, or chronic adverse health effects are expected to occur via any exposure route under normal conditions of use by qualified persons. For sensitive or susceptible individuals, treat symptomatically as described below.

### INHALATION

Breathing difficulty caused by inhalation of particulates requires removal to fresh air. If breathing has stopped, perform artificial respiration if qualified and trained, and obtain medical assistance at once.

### INGESTION

Obtain medical assistance at once regardless of the presence or absence of symptoms. Only induce vomiting if advised by a medical professional.

### SKIN

Subcutaneous deposition through skin cuts and abrasions can be treated by standard first aid measures. Skin contamination through direct contact can be removed by washing with soap and water. If irritation persists, obtain medical assistance.

### EYES

Material should be flushed from the eyes with copious amounts of clean water. If irritation persists, obtain medical assistance. *Do not* rub the eyes if particulate matter or foreign objects are present, as corneal damage can occur.

## Section 5: Firefighting Measures

### SUITABLE EXTINGUISHING MEDIA

Use water, dry chemical, foam, or carbon dioxide to extinguish fire.

### FIREFIGHTING PROCEDURES

Do not flush down sewers or other drainage systems. Exposed firefighters must wear NIOSH-approved positive pressure self-contained breathing apparatus with full-face mask and full protective clothing.

### UNUSUAL FIRE AND EXPLOSION HAZARDS

None known.

### COMBUSTION PRODUCTS

### PERSONAL PRECAUTIONS, PROTECTIVE EQUIPMENT, EMERGENCY PROCEDURES FOR NONEMERGENCY PERSONNEL

Spills or releases of this product are not expected to result in significant emergency response procedures. Wear protective cotton gloves or equivalent when cleaning spilled or released material.

### PERSONAL PRECAUTIONS, PROTECTIVE EQUIPMENT, EMERGENCY PROCEDURES FOR EMERGENCY RESPONDERS

If large amounts of spilled or released materials are involved, wear appropriate and approved protective clothing appropriate to the incident to prevent skin contact. Respiratory protection should be worn if material is involved in a fire. *Refer to Section 8.*

### ENVIRONMENTAL PRECAUTIONS

Prevent water used to extinguish fires from reaching drains, sewers, surface waters, or groundwater.

### METHODS AND MATERIALS FOR CONTAINMENT AND CLEANUP

Released material in dry form may be swept up using a broom and dust pan, or picked up by hand if wearing protective cotton gloves or their equivalent. Prevent water used to extinguish fires from reaching drains, sewers, surface waters, or groundwater by diking, berming, or using vacuuming methods to clean up extinguishing media.
